

Cooper CDI

Presents:

The Clinical Documentation Improvement Team (CDI) is offering documentation education for providers. We realize that you may need assistance with documentation for your professional (E&M) services.

Do you often ask yourself “What **MORE** do they want me to document?” or “Why do I receive RAI’s and what do they mean?”

If you have these questions or others, we are here to help you! The CDI team will be holding several Structured Presentations on accurate and compliant documentation for Evaluation and Management services as well as walk-in Open Forums. Please feel free to attend any of the Structured Presentations or Open Forums.
