POWER OF PREVENTION

Join us as Dr. Berkowitz discusses the importance of prevention in treating children and adolescents. Prevention plays a key role in addressing the mental health crisis as there is greater need than there are clinicians.

TRAUMA INFORMED CARE

Dr. Berkowitz has developed a model for secondary prevention for children exposed to traumatic events. He will share with us this model as well as insights from the manuals he's written on acute responses for disasters and other critical incidents.

NEW FRONTIERS IN THERAPY

Dr Berkowitz will discuss his research and present on innovative new approaches to therapy. These include new methods of treating trauma related disorders- including exploring the role of psychedelic assisted psychotherapy.

SPONSORED BY THE PEDIATRIC MENTAL HEALTH TRAINING PROGRAM

The Cooper Health System is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. The Cooper Health System takes responsibility for the content, quality, and scientific integrity of this CME activity. The Cooper Health System designates this live activity for a maximum of 1 AMA PRA Category 1 Credit™ per session. Physicians should claim only the credit commensurate with the extent of their participation in the activity. Successful completion of one hour of a continuing medical education (CME) course recognized by the American Medical Association, the American Osteopathic Association, or the American Podiatric Medical Association is equal to one hour of continuing education for New Jersey nursing license renewal (New Jersey Board of Nursing 13:37-5.3). All planners, faculty, and others participating in continuing medical education activities sponsored by The Cooper Health System are expected to disclose all financial relationships. Documentation will remain on file in the Department of CME.

The learner objectives for this activity are to improve diagnostic skills, increase knowledge of all psychiatric disorders, and discuss recent advances in all areas of psychiatry, psychopharmacology, psychotherapy, and evaluative techniques. The intended audience for this activity includes psychiatrists and psychologists. Other healthcare professionals including physicians from other disciplines, fellows, residents, medical students, nurses, therapists, and social workers may also participate.
