Tomar 1 capsula por vía oral diariamente.
- fentaNYL** 100 mcg/hr patch
También conocido como: DURAGESIC
1 Patch by Transdermal route Every 72 hours. Indications: severe chronic pain with opioid tolerance

AVS preview is where the AVS is defaulted but it can be changed to English once the Patient has been given their copy in Spanish. This will allow the RN to utilize the English copy, whether printed or on a computer, to review the AVS with the patient. **This can be done in conjunction with Cooper's interpreter device solution VOYCE or a Certified Interpreter.**
