

Windows 11 introduces several exciting features and enhancements designed to improve your experience. Here are some of the highlights:

### Redesigned Interface

- **Centered Start Menu:** The Start Menu is now centered on the taskbar, offering a clean and modern look.
- **Rounded Corners:** Windows and menus have rounded corners, giving a softer, more visually appealing design.

### Productivity Enhancements

- **Snap Layouts:** Easily organize open windows into different layouts to maximize screen space.
- **Virtual Desktops:** Create personalized desktops for different tasks, such as work, gaming, or personal use.
- **Improved Multitasking:** Snap Assist helps you align windows perfectly, and Snap Groups remember your layout.

### Personalization

- **Customizable Start Menu:** Pin your favorite apps and get smart recommendations based on your activity.

### Creative Tools

- **Generative Erase:** Remove unwanted parts of images seamlessly.
- **Image Creator:** Generate images based on text prompts in various styles.

These features are designed to make your workflow more efficient, your desktop more personalized, and your overall experience more enjoyable. If you have any specific questions about these features or need further details, please contact the Service Desk at 856.968.7166.
